ACADEMIC DETAILS

Year	Degree/Exam	Institute	Score/%
2024-present :	BTech/CSE	Graphic Era Hill University	8.64
2024:	Class XII	Siddhartha Public School	81.6
2022:	Class X	MastNath Public School	90.2

FIELDS OF INTEREST

- Operating Systems , Multithreading , Machine Learning , Data Structures and Algorithms

TECHNICAL SKILLS

- **Languages** -> C, C++, Java , JavaScript , SQL
- **BackEnd/DataBases** -> MySQL , Node.js
- **FrontEnd** -> Html , Css
- **Tools** -> Git , Github , Docker , VSCode , IntelliJ , Linux , Bash
- **CourseWork** -> Data Structures And Algorithms , Object Oriented Programming

MAJOR PROJECTS

- **Distributed File Transfer System (C++, Compression Algorithms, VSCode, TCP Sockets)**
Jan, 2026 - March, 2026
 - Built a Distributed File Transfer System with Self Implemented File Compressor Using LZW Compression Algorithm and Networking Concepts.
 - Structured into 3 major modules i.e Connectivity, Compression and File handling.
 - Successfully implemented connectivity between 2 Devices on the same LAN or local host to transfer files faster and efficiently.
 - Achieved 60% Reduction in file size for typical text files before the transmission.
- **User-Level Thread Library (C, VSCode, Context Switching , Multithreading)**
Dec, 2025 - March, 2026
 - Implemented a Co-operative Thread Library in C language that provided User level Thread Management with custom TCB (Thread Control Block).
 - Implemented a Process Scheduler from scratch following the format of round robin scheduler.
 - TCB provides functionalities like thread_create, thread_join , thread_yield etc.
 - Enables the threads to run concurrently almost similar to parallel manner.
- **TryMore | Coding platform (HTML , CSS , JavaScript, MySQL , Docker , Redis , Node.js)**
March, 2026 - Present
 - Developed a coding competition platform supporting multiple programming languages.
 - Implemented functionalities like Exact test case matching or not, Auto save, Copy-Paste and Tab switching detection, Test History databases etc.
 - Created a leaderboard and contest dashboard to track rankings, submissions, and performance.
 - Utilized Docker containers to host the contests in an isolated environment.
 - Built Job Queue Evaluation pipelines for multiple submissions at once.

ACHIEVEMENTS

- Solved 400+ problems in *LeetCode* and *CodeForces*.
- 1600+ rated in contests in LeetCode.

- Led the team in Smart India Hackathon and got shortlisted for the second round.
- Secured second place in university level debate competition (Debathon).

INTEREST AND HOBBIES

- Reading.
- Table Tennis.
- Sketching.
